## Letter of recommendation

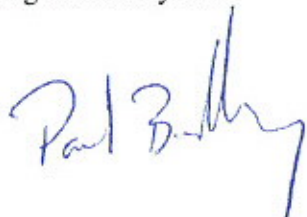

Between 2006 and 2008 Skanska has purchased approximately 27.000m<sup>2</sup> of filigran slabs from Strobud in Poland. This was to 4 different jobs of which all 4 were residential buildings. Being residential buildings, there was a high demand on quality and finish. This was achieved well by Strobud. There were also a large number of items which needed casting in and this was also performed well.

I found Strobud to be a professional and ambitious company who are willing to find solutions where problems occur.

I would recommend using Strobud again in the future.
